

Safety Charter

The signatories to this charter are committed to ensuring that safety rules are observed on construction sites. Our goal is to preserve the lives and physical integrity of all persons on the site. In our sphere of competence, we do everything to enforce the safety rules. If necessary, we interrupt work and say STOP.

STOP IN CASE OF DANGER / ELIMINATE HAZARD / RESUME WORKING

As a planner

- When compiling the tendering documents, I include information on the hazards associated with the project.
- I lay down the corresponding safety rules. I plan and coordinate the work to be done by the different companies.
- I ensure that safety is taken into account at every phase of construction. I check the implementation of the measures proposed. If necessary, I arrange for improvements to be made.
- I interrupt work immediately if there are any serious breaches of the safety rules.

As a supervisor

- I analyze the tendering documents and define the safety rules required.
- I give instructions to my staff and provide the personal protective equipment.
- I give my co-workers an opportunity to make decisions. I check the implementation of the measures proposed.
- If necessary, I arrange for improvements to be made. I interrupt work immediately if there are any serious breaches of the safety rules.

As an employee

- I obtain information, make suggestions and comply with the safety rules and the work instructions.
- I do not attempt to tamper with any protective devices. I ensure that I do not endanger anyone.
- I ensure that my workplace is safe. I rectify any defects at once or report them to my supervisor.
- In the event of any serious breach of safety rules, I interrupt work and inform my colleagues and supervisor
